

**Is an inefficient vTESTstudio  
configuration wasting your  
test project valuable time?**

**The initial configuration of vTESTstudio is a time-consuming and error-prone process.**

**Before starting the test design, numerous project settings, libraries, and tool links must be customized individually.**

APPROACH

## Our Approach:

1. Create project structure and base library
2. Configuration of the test environment
3. Verification and handover

- **Instant productivity**
- **Optimized tool chain flow**
- **Prevention of correction loops by avoiding false starts**
