

**Are your requirements
blocking efficient test
case creation?**

Why does starting regular testing often take longer than planned?

When requirements are not written with testing in mind, the creation of Test Cases can be greatly obstructed.

APPROACH

Asses Test Plan

- Checking the Test Plan for the required Test Methods

Checking Development Plan

- Checking the Software development plan for the required requirements (e.g. formal or Semi Formal)

Review Requirements

- Analyze the requirement in relation of structure, testability and format.

Deliver Requirements Quality Report

- Discuss results of Quality Report with Requirement Team.
Agree on further actions.

- Higher consistency between developers, testers, and stakeholders
- Full test coverage (traceability)
- Higher degree of automation
- On-time acceptance
