

**How can you improve your
product while reducing
costs?**

Value Analysis / Value Engineering (VA/VE) is a structured approach to improving product design, enhancing functionality, and reducing costs while increasing overall product value.

- We identify optimization potential.
- We analyze the impact and effects of the proposed improvements.
- We plan and implement the selected improvements.

YOUR BENEFITS

- You get a better Product with reduced costs.
- You get an improved position on the challenged market.
- You get practical VA/VE expertise from experienced engineers.
