

IS YOUR PROJECT ASPICE-COMPLIANT?

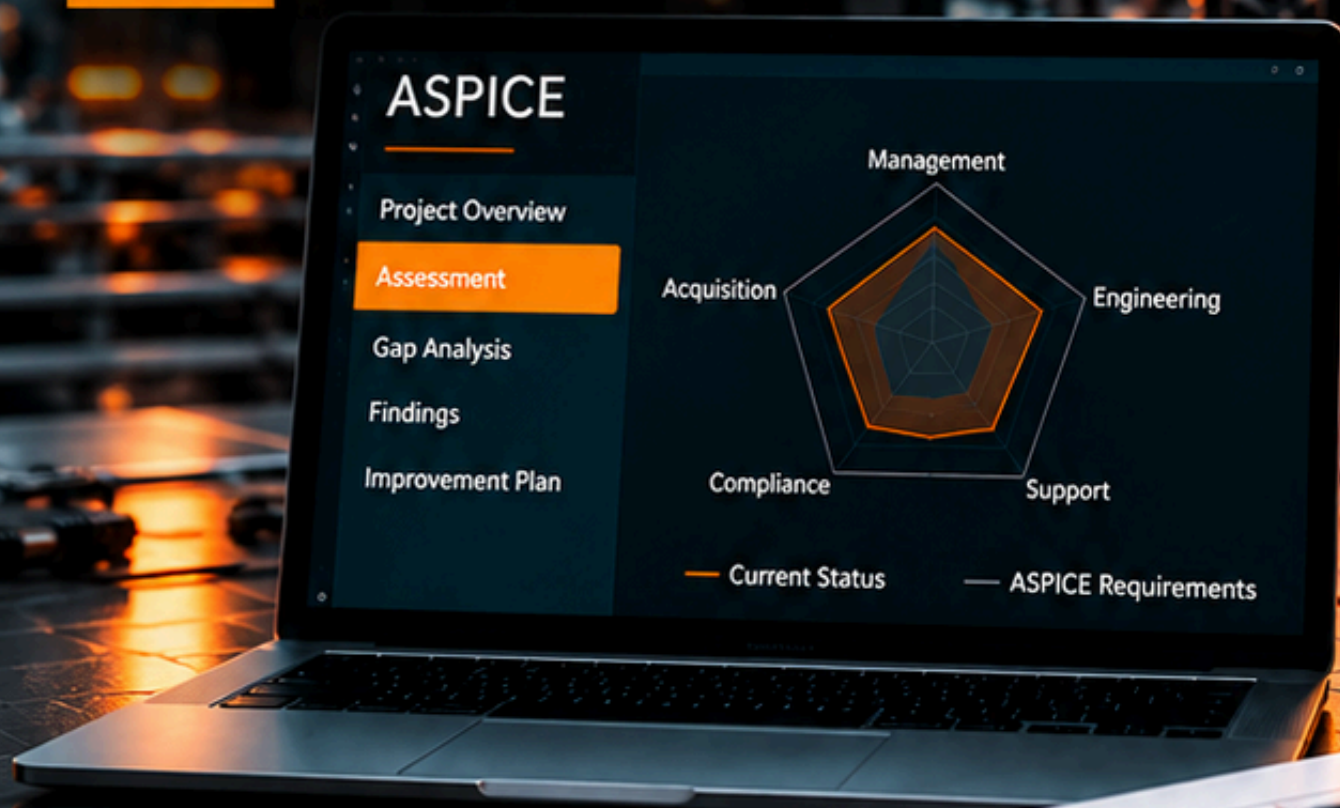

IDENTIFY GAPS.
DEFINE IMPROVEMENTS.
STRENGTHEN YOUR
ASPICE COMPLIANCE.

FROM
COMPLIANCE ANALYSIS
TO MEASURABLE
IMPROVEMENTS.

UNCERTAINTY. COMPLEXITY. RISKS.

Requirements

Process Assessment

Gap Analysis

Improvement Plan

You don't know if your project is **compliant with ASPICE requirements?**

We help you assess your project's ASPICE compliance, identify gaps, and turn the findings into a clear, actionable improvement plan.

FROM UNCERTAINTY
TO CLEAR PROGRESS.

Complex requirements

ASPICE processes and work products can be difficult to interpret and apply.

Unclear project status

It's often not transparent where you currently stand regarding ASPICE compliance.

Risk of non-compliance

Gaps can lead to rework, delays and increased costs in later project phases.

Need for expert support

Internal resources and know-how are often limited.

OUR APPROACH.

STRUCTURED.
OBJECTIVE.
ACTIONABLE.

Our structured approach helps you assess your project against **ASPICE requirements**, **identify gaps** and **define a clear improvement plan**.

01

Analyze

Review your project and document the current status with respect to ASPICE requirements.

02

Identify

Compare the current status with the ASPICE reference model and identify gaps or deviations.

03

Improve

Turn the findings into a clear, practical improvement plan to help close the identified gaps.

FROM ANALYSIS
TO MEASURABLE IMPROVEMENTS.

YOUR BENEFITS.

CONSISTENT
RESULTS.
HIGHER QUALITY.
LESS EFFORT.

YOUR BENEFITS

Faster time to market

Efficient and automated test processes help you reach your project milestones more quickly.

Higher software quality

Early and consistent testing reduces defects and increases the reliability of your systems.

More efficiency

An integrated tool chain minimizes manual effort and optimizes your test workflow.

Reliable and repeatable results

Standardized configurations ensure consistent and reproducible testing.

KEY FACTS

Target group

OEMs, Tier 1 suppliers and development teams working on automotive software projects.

Typical duration

Depending on project scope and complexity.

Result

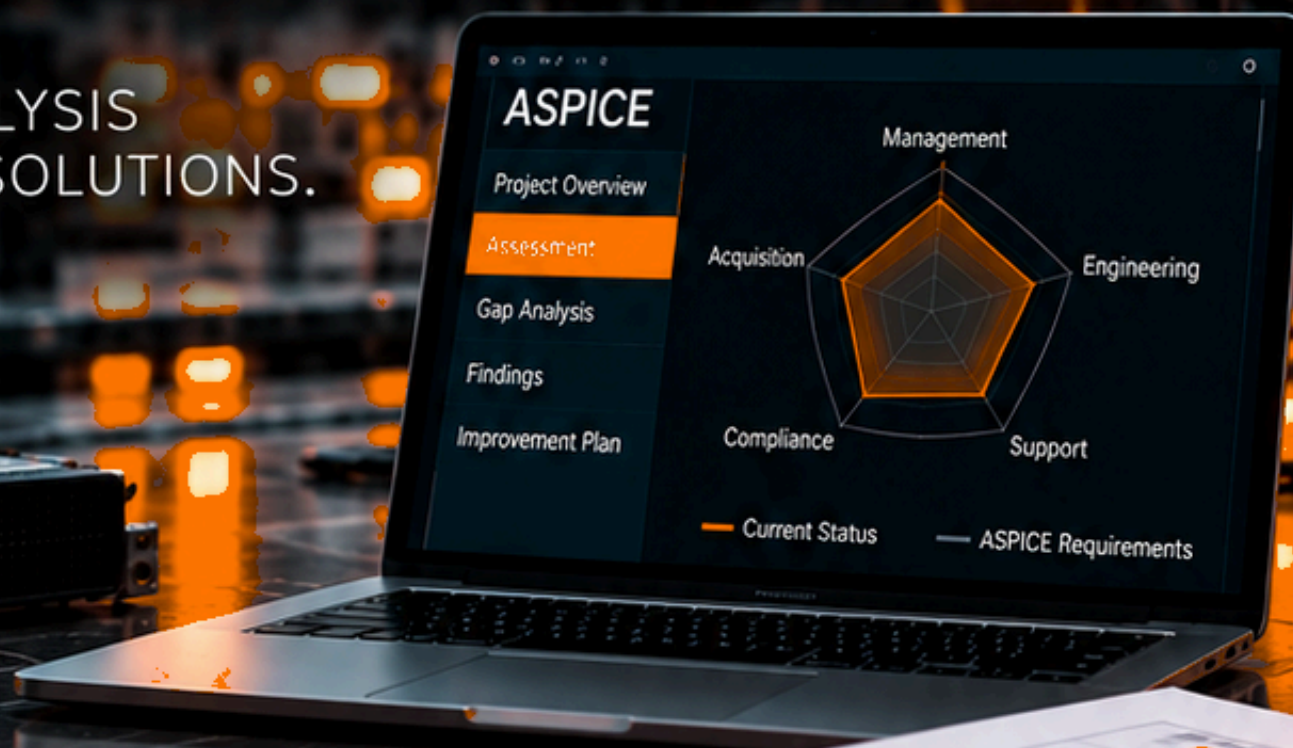

A clear, actionable improvement plan based on detailed test results and analysis.
