

IS YOUR vTESTSTUDIO CONFIGURATION TIME-CONSUMING AND ERROR-PRONE?

FROM ANALYSIS
TO SAFER SOLUTIONS.

From configuration to testing – without unnecessary delays.

The initial configuration of vTESTstudio can be a **time-consuming** and **error-prone** process.

Before test design can begin, numerous project settings, libraries, and tool links need to be configured individually. This requires additional effort and can lead to avoidable configuration errors before the actual testing even starts.

A structured and correctly configured test environment provides the foundation for efficient test development and a smooth toolchain workflow.

Faster setup

Get started quickly with a well-structured configuration.

Fewer errors

Reduce configuration mistakes and avoid delays.

Seamless toolchain

Integrate vTESTstudio, CANoe and CAPL efficiently.

More time for testing

Focus on what really matters – validating your systems.

OUR APPROACH.

STRUCTURED.
EFFICIENT.
RELIABLE.

Our structured approach with vTESTstudio guides you from setup to results – ensuring **efficient**, **reliable** and **repeatable** testing.

01

02

03

Configure

Set up your test environment with project settings, libraries and tool integrations such as CANoe and CAPL – tailored to your specific ECU and testing requirements.

Execute

Run automated test cases from unit tests to system-level validation. vTESTstudio manages the execution, monitors results in real time and ensures consistent test workflows.

Analyze

Review detailed test results, identify issues early and increase test coverage. Clear reports and integrated analysis tools help you make data-driven decisions and improve quality.

YOUR BENEFITS.

INSTANT
PRODUCTIVITY.
OPTIMIZED FLOW.
LESS REWORK.

vTESTstudio
CANoe
CAPL
Test Automation

With our vTESTstudio configuration service
you get a solid foundation for **efficient
and reliable test automation.**

Instant productivity

Get started quickly with
a ready-to-use project
structure and base library.

Optimized tool chain flow

A fully integrated test
environment ensures
a smooth workflow from
vTESTstudio to CAPL,
CANoe and the ECU.

Prevention of correction loops

A verified and tested setup
minimizes errors and avoids
false starts in your test
projects.
